

Tests with Postman :

Get New Access token in Postman :

Make POST request with 'bilemo.ttvo.fr/oauth/v2/token'

On the 'body tab', check 'raw', 'JSON' and inquire:

```
{
  "grant_type": "password",
  "client_id": "YourClientId",
  "client_secret": "YourClientSecret",
  "username": "YourUsername",
  "password": "YourPassword"
}
```

You will receive an access token and a refresh token.

Your access token expires after one hour !

Connect to the Api with this access token

1. Get products's list : Make GET request with 'bilemo.ttvo.fr/api/products'

On the 'authorization', choose 'Bearer token', and copy-paste the access token.

2. Show a product : Make GET request with 'bilemo.ttvo.fr/api/products/{id}'

3. Create a new product : Make POST request with 'bilemo.ttvo.fr/api/products/'

On the 'body tab', check 'raw', 'JSON' and inquire:

```
{
  "name": "NomDuProduit",
  "description": "DescriptionDuProduit",
  "brand": "Marque"
  "price": "Prix"
}
```

4. Create a new user : Make POST request with 'bilemo.ttvo.fr/api/users/'

On the 'body tab', check 'raw', 'JSON' and inquire:

```
{
  "username": "YourUsername",
  "email": "YourEmail",
  "password": "YourPassword"
}
```

5. Get user's list : Make GET request with 'bilemo.ttvo.fr/api/users'

6. Show a user : Make GET request with 'bilemo.ttvo.fr/api/users/{id}'

7. Delete a user : Make DELETE request with 'bilemo.ttvo.fr/api/users/{id}'

Use the refresh token

Make POST request with 'bilemo.ttvo.fr/oauth/v2/token'

On the 'body tab', check 'raw', 'JSON' and inquire:

```
{
  "grant_type": "refresh_token",
  "client_id": "YourClientId",
  "client_secret": "YourClientSecret",
  "refresh_token": "YourRefreshToken"
}
```

Documentation

You will find the documentation at 'bilemo.ttvo.fr/api/doc'
